THE NEW WAY FORWARD FOR ACERS

WELCOME TO THE REFRESHED ACERS.

Fresh, invigorated and ready to serve our community!

Who is Acers?

- We believe in making your life easy, and getting things done – whether its dispatching your order quickly, resolving your enquiries, actioning your product requests, or taking care to hold the right stock for you. We believe in doing it right, so its done once and it doesn't have to be done again.
- Acers is family owned, right here in New Zealand. We breathe a fresh service level and approach into dental procurement.
- The Broomhall brothers, who offer up a wide variety of skills and experiences, came together and acquired Acers in 2020. Backgrounds in electrical automation, stainless steel engineering and international consumable product development and sourcing brought about commercial skills such as quality control, warehousing, marketing, sales and accounting. Together, this family bring together a unique range of skills from working at the coal-face. Experience shows that a dependable supply of quality products improves the end result.

FREIGHT POLICY: \$7.90

No matter the order size (including gloves).

EASY RETURNS

No re-stocking fee.

EXCELLENT STOCK LEVELS

Our goal is ZERO backorders.

EASY ORDERING

Phone us 24/7, email or online.

MISSION

EASY, DONE.

Acers believe in making your life easy by getting things done.

VALUES

MAKE IT EASY.

GET THINGS DONE.

We're nimble, we listen and respond warmly. We do the running.

FRESH APPROACH.

We breath a fresh service level and approach into dental procurement.

FAMILY FOCUSED.

A warm family spirit that makes dentistry safe and enjoyable.

FILLING AND RESTORATIVE

COMPOSITES

PROFIL™ FLOW

Flowable Composite.

ProFil™ Flow is a visible - light activated, radiopaque, flowable composite. The excellent flowable consistency characteristics makes ProFil™ Flow an ideal composite for filling cavities.

Features

- Excellent esthetic properties
- No oozing or slumping
- Perfect for minimal invasive restorations
- Low Viscosity
- Maximum versatility
- High polish retention and stable color match
- Long term fluoride release
- Low shrinkage
- Indications
- Class III, Class V, Smaller Class IV restorations
- Base/liner in Class I and Class II restorations
- Repair of resin, porcelain and acrylic temporary materials
- Pit and Fissure sealant
- Restoration of minimally invasive cavity preparations
- Undercut blockout.

Physical Properties

- Sensitivity to ambient light: Above 100s.
- Weight of total inorganic filler: 78%
- Volume of total inorganic filler: 59%
- Depth of cure: 1.5 mm
- Compressive strength: 230 MPa
- Flexural Strength: 120MPa
- Water Absorption: 40 µg / ⅓
- Solubility: 7.5 µg / ⅓.

PROFIL MICRO HYBRID COMPOSITE

Universal Restorative Composite Resin, for use in both Anteriors and Posteriors. ProFil™, is a micro hybrid composite material available in Syringe or Capsules.

Made in Israel

Features

- High polishability
- Non sticky formula
- Optimal balance of physical properties
- Light cured, radiopaque and color stable
- Low polymerization shrinkage
- Fast placement technique, easy to apply and sculpt
- High strength and wear resistance
- Available in 14 shade.

Physical Properties

ProFil™, a micro hybrid composite has outstanding physical properties that provide excellent wear resistance.

- Sensitivity to ambient light Above 100 sec.
- Weight of total inorganic filler 78%
- Volume of total inorganic filler 59%
- Depth of cure > 1.5 mm
- Compressive strength > 230 MPa
- Flexural Strength > 120MPa
- Water Absorption < 40 µg / ⅓
- Solubility < 7.5 µg / ⅓.

20x.25g Compules

PRIME-DENT® FLOWABLE COMPOSITE

THE DENTAL ADVISOR
++++½

- Highly polishable, 67% filled esthetic composite used for all types of cavity preparations.
- Kit - includes 4 x 2g syringes in shades A2, A3, A3.5, B2.

Kit: 004-010

OUR PRICE **\$61.00**

PRIME-DENT® NANO-HYBRID COMPOSITE

A resin composite with unique nanofiller technology. Formulated with nanocluster filler particles, it combines the strength of a Hybrid with the polish of a Microfil.

- Easy to control during placement.
- Not sensitive to ambient light.
- Adapts well to cavity preparations.
- Does not stick to the placement instruments.
- Can be contoured to the desired shape before curing.
- Highly rated for blending with tooth structure, radiopacity and ease of finishing.
- Finished and polished to a high luster.

EZETCH

37% Phosphoric Acid Etchant.

EZ Etch contains phosphoric acid for etching tooth enamel and dentin when preparing surfaces for application of composites.

- High quality, non drying, medium viscosity gel
- Stays put, does not run
- Large & comfortable to use syringes
- Visible color
- Non drying
- Washes off easily
- Easily placed
- One lump wash off
- 5x3ml syringes + 10 tips
- Tip can be angled to facilitate easy and accurate placement of the gel even in disal and lingual composite preparations

Code: 2073

OUR PRICE **\$31.00**

ECO-S™

Opaque Resin-based Pit and Fissure Sealant.

- Eco-S™ is a single part, light curing, pit and fissure sealant.
- It is Based on methacrylate resin chemistry. It can be used as a pit and fissure sealant for the prevention of caries.
- Curing Time 20 seconds.
- Pack of 4 x 1.2ml syringes with 20 disposable prebent tips.

Features and benefits

Eco-S™, pit and fissure sealant, is light-cured dental material designed for sealing the enamel pit and fissure of teeth for the prevention of caries. By adding specific nano-fillers to Eco-S™, it has good properties like shear bond strength, micro-leakage and wear resistance.

Eco-S™ has an appropriate viscosity, to enable the sealant to penetrate the depths of pits. So it provides good efficacy as well as workability.

Indications

Sealing the enamel pits and fissures of teeth for prevention of caries.

Package

4 x 1.2ml syringes with 20 disposable prebent tips.

Code: 4002

OUR PRICE \$59.00

PRIMA 2000

Single Step Bonding Agent

- Primer with adhesive
- Use with Autocure Activator to enhance bond in light inaccessible procedures
- 10ml bottle

Code: 100230

OUR PRICE **\$82.00**

PROLINK

Universal Dental Adhesive

- Primer and sealer in one bottle
- Minimal treatment time
- Perfect marginal integrity
- Reduced polymerisation shrinkage
- Increased adhesion & durability
- 5ml bottle

Code: 150005

OUR PRICE **\$65.00**

CEMENT

HIGH Q BOND SE TRANSLUCENT

Self-Etch/Self-Adhesive Dual Cured. Permanent Adhesive Resin Cement.

- Superior retention and total margin integrity
- Does not require etching, priming or bonding before cementing the permanent restoration.
- Self-cured cement which you can light-cure for an immediate set and extra strength at the margins.
- Radiopaque – Easily seen in radiograph.
- Fluoride – Known to reduce the possibility of secondary caries and considered to be cariostatic.
- Auto mix Syringe – Saves application time, guarantees consistent mix.
- Virtually neither taste nor odour – Increased patient comfort.

Translucent: 100052SE

OUR PRICE **\$156.00**

MATRICES

SADDLE CONTOURED METAL MATRICES UNIVERSAL KIT

Shape with enlarged undergingiva ledge.

Edges of saddle matrices have cylinder-shape tubes where tines or a spring clip are inserted upon matrix installation.

- Easy-to-use matrix system
- Optimal approximal contact without difficulty
- Three lengths
- Stainless steel
- 0.050mm thick.

36 pieces

Code: 1.330

OUR PRICE **\$72.00**

METAL CONTOURED MATRICES

- Anatomically pre-shaped
- Shapes for molars and premolars

- Provide perfect approximal form and contact

- Stainless steel
- 0.050mm.

OUR PRICE \$29.00

For Molars bilateral

Code: 1.512 matrix width
OUR PRICE \$29.00

Matrices 1.501 and, 1.511 are mainly to be used with Tofflemire retainer.

TRANSPARENT CONTOURED MATRICES KIT

- Anatomically pre-shaped.
- Four shapes of premolar matrices and four shapes of molar matrices.
- Provide perfect approximal form and contact.

120 pieces

For premolars:

- shape 1 (one central ledge) 15 pcs.
- shape 2 (two central ledges) 15 pcs.
- shape 3 (right ledge) 15 pcs.
- shape 4 (left ledge) 15 pcs.

For molars:

- shape 1 (one central ledge) 15 pcs.
- shape 2 (two central ledges) 15 pcs.
- shape 3 (right ledge) 15 pcs.
- shape 4 (left ledge) 15 pcs.

ANTERIOR MATRICES & STRIPS KIT

30
pieces

Proximal anterior strips can be used upon restoration of proximal surfaces of anteriors.

- Proximal anterior matrices 1.387A – 6 pcs.
- Proximal anterior matrices 1.387 – 6 pcs.
- Proximal anterior matrices 1.388 – 6 pcs.

Twin anterior matrices provide perfect restoration of both interproximal and cervical surfaces of anteriors.

- Twin anterior matrices 1.523 – 6 pcs.
- Twin anterior matrices 1.533 – 6 pcs.

Code: 1.888

OUR PRICE **\$63.00**

SECTIONAL CONTOURED METAL MATRICES

Matrices of 0.05mm thickness are intended for restoration of large decays in subgingival area. Such matrices retain the shape well.

- 0.050mm, Hard
- Anatomically pre-shaped
- Provide tight anatomical contact
- Stainless steel
- Hard matrices are easy to install
- 50pcs

Small: 1.0972-50,
Medium: 1.0976-50,
Large: 1.0973-50,
Large with Ledge: 1.0974-50

OUR PRICE **\$55.00**

METAL MATRIX BANDS

For Premolars

Finest Tofflemire bands available.

Consistently achieves better contours, tighter contacts, and healthy periodontium in posterior composite or amalgam restorations with easy to apply matrix bands.

For Molars

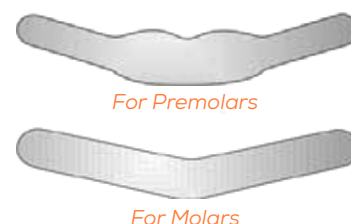

Without Ledge

- Finest Tofflemire bands available.
- Consistently achieves better contours, tighter contacts, and healthy periodontium in posterior composite or amalgam restorations with easy to apply matrix bands.

- 0.050mm
- 12pcs

Premolars: 1.0932,
Molars: 1.0931

POLISHING

PROFIL FINISHING KIT

Autoclavable Finishing Burs

- The set is designed to make the tough task of composite finishing significantly simpler, shorter, and more efficient while giving excellent clinical results.
- Polish the composite without the need to use disc, paste, or polisher, with the benefit of a reusable autoclavable solution that saves cost over time.
- No need to use polishing discs/rubber polishers
- Faster work - 10-20 seconds instead of 3-5 minutes
- Much more cost effective - save up to 75%
- No bleeding - doesn't cut the gingival
- Quick and easy learning curve. Very durable.

Code: 199PFK

OUR PRICE **\$90.00**

WHITE STONE POLISHING KIT

- FG White Stone Point composite finishing Kit/12.
- Made of micro-grained aluminium oxide grains.
- Excellent for fine finishing of composite restorations, compomers, enamel and porcelain. Contains Flame (F4) x 6 and Needle (F5) x 6.

TURBO DIAMOND BURS

The design of the Turbo Diamond Bur provides a special cooling effect to prevent heat increase.

These improved second-generation Burs will work faster for you at a cooler temperature.

- The Turbo Bur design rapidly eliminates excess heat to allow a cooler operating temperature reducing the level of tissue trauma
- Bur design enables water through the spiral channels directly to the contact point
- Self-cleaning for faster removal of debris. Reduces the danger of pulp lesions
- Multi-layer cutting edge with spiral channels coated in natural diamond particles to support faster, super high cutting efficiency.

TURBO CROWN REMOVAL BURS

Revolutionary Crown cutting solution.

Hybrid Twister water cooling crown cutter, the Turbo Crown bur is designed to operate faster at a cooler temperature by delivering water to the contact point. Designed for Zirconia crown, and metal crown or bridge removal. No breakage, non slip, no vibration.

- The Turbo Bur design enables water through the spiral channels/grooves directly to the contact point
- Rapidly eliminates excessive heat to allow a cooler operating temperature reducing the level of tissue trauma. Multi-layer cutting edge
- The spiral channels/grooves are all coated in natural diamond particles to support super high cutting efficiency and fast removal of debris.

ENDODONTICS

WELL-ROOT™ PT

Premixed root canal filling material

Features and benefits

- Premixed putty without mixing process
- Paste-only filling
- Proper setting time for applications
- Superior compressive strength
- Antibacterial effects by alkaline pH
- Biocompatible elements
- Radiopaque.
- Calcium aluminosilicate paste (putty type)
- 0.25g x 10 capsules

Indications

- Pulp capping
- Repair of root perforation
- Repair of root resorption
- Root-end filling
- Apexification.

Code: 2070

OUR PRICE \$174.00

NEEDLE AND TIPS

DENTAL NEEDLES

Box of 100

Electric discharge of all products on hub hole.

Design of ergonomical cap.

Special design for effectiveness of sterilization.

Special heat treatment of tube makes them super-elastic.

Tri-bevel point, reduces pain and smooth repeated injection. Perfected treatment of surface protect the gum without damage of tissue.

- Design of ergonomical cap
- Special design for effectiveness of sterilization
- Electric discharge of all products on hub hole
- Tri- bevel point for easy tissue penetration without coring
- The round cutting edge protecting the gum
- The most strict grinding angle, ratio of tri-bevel points reduce pain
- The highest quality of saline coating substantially reduces pain and smooth repeated injection
- Special heat treatment of pipes makes super-elastic
- Bevel indicating mark.
